Mixed SAN and NFS environments 1

Mixed SAN and NFS environments

In mixed SAN and NFS environments, the management and data interface must be mapped so that the first data interface is the same as the management interface.

In the following example, the management interface is 10.72.197.91, and the data interface is 10.72.220.91.

```
#snapdrive config set -mgmtpath f3050-197-91 f3050-197-91 f3050-197-91  
f3050-220-91
```

```
#snapdrive config list -mgmtpath
```

system name	management interface	datapath interface
bart	10.72.197.91	10.72.197.91 10.72.220.91
