Connecting to Snapshot copies of shared storage entities other than LUNs

You can use the `snapdrive snap connect` command to connect to a Snapshot copy of shared storage entities other than LUNs.

Steps

1. Enter the following command:

```
snapdrive snap connect fspec_set [fspec_set...] -snapname long_snap_name  
fspec_set [fspec_set...] -snapname long_snap_name [-devicetype shared] [-split]
```

In this syntax, *fspec_set* is: `{-dg | -fs} src_file_spec [dest_file_spec] [-destdg dgname]`
