Configuration files installed by SnapDrive for UNIX

SnapDrive for UNIX installs the `snapdrive.conf` file, which stores configuration information for the current version of the product.

You should modify the `snapdrive.conf` file for your system. If you upgrade your version of SnapDrive for UNIX, it maintains your current `snapdrive.conf` file. The configuration file is available at the following location:

```
/opt/NTAPsnapdrive/snapdrive.conf
```
