Contents of an audit log file

The audit log shows information about commands you issued with SnapDrive for UNIX.

The audit log file maintains the history of the following information:

- The commands issued.
- The return value from those commands.
- The user ID of the user who invoked the command.
- A timestamp indicating when the command started (with no return code) and another timestamp indicating when the command finished (with a return code). The audit log record shows only information about `snapdrive` use (issued commands).

An audit log file contains the following information.

Field	Description
uid	user ID
gid	group ID
msgText	message text
returnCode	return code from a command
