Disable a node or a cluster from using shared resources

You have to modify the `/etc/VRTSvcs/conf/config/main.cf` file to disable a node from using a shared resource. For more information about the `main.cf` file, see the Veritas Cluster Server *Installation Guide for Solaris*.

To disable a node from using a shared resource, use the following syntax:

```
snapdrive storage disconnect -fs file_spec -lun long_lun_name [lun_name...] [-  
devicetype shared]
```
