Reason to refresh the DMP paths ..... 1

# Reason to refresh the DMP paths

On hosts with FC and DMP configurations, the `snapdrive storage delete - lun` command can hang.

The command may hang because of inappropriate installation or configuration of the following components:

- NTAPasI
- Veritas stack (storage foundation)
- Multipathing licenses

You must refresh the DMP paths information properly after any FC path is enabled, disabled, or added. To refresh the DMP paths, execute the following commands in the sequential manner as listed below.

Platform	Command
Solaris	<ul style="list-style-type: none"><li>• <code>devfsadm -Cv</code></li><li>• <code>vxdisk scandisk</code></li></ul>
