Unable to select a storage stack 1

Unable to select a storage stack

You cannot select a storage stack due to inappropriate values specified in the `snapdrive.conf` file.

The following warning message appears.

```
WARNING!!! Unable to find a SAN storage stack. Please verify that the appropriate transport protocol, volume manager, file system and multipathing type are installed and configured in the system. If NFS is being used, this warning message can be ignored.
```

- If you are using an NFS environment, ignore the warning message and continue to use SnapDrive operations on your host system.
- If you are using SAN environment, ensure that the appropriate acceptable values are specified in the `snapdrive.conf` file as provided in the Solaris matrix stack. Then, restart the daemon.
