Verification of storage system readiness and licenses

Before you install SnapDrive for UNIX, you must verify the storage system readiness and check for licenses of certain software.

You must ensure that the following conditions are met:

- The storage systems are online.
- The storage systems meet the minimum system requirements for SnapDrive for UNIX.
- The HBAs or network interface cards (NICs) in your storage systems meet the requirements for your host operating system.

For more information about HBA cards, see the Interoperability Matrix.

- The hosts and the storage systems can communicate by using an Internet Protocol (IP).
- The licenses for the following are valid:
 - SnapRestore
 - MultiStore software
 - Secure HTTP access to the storage system
