Volume-based snap restore operation fails in slave node

With SFRAC on Solaris, volume-based snap restore (vbsr) operation fails in slave node.

SnapDrive for UNIX displays the following error message.

```
Status call to SDU daemon failed
```

Workaround

While running a `snap restore` command with `-vbsr` option, you must ensure to use `-force` along with `-noprompt` option on the slave node.
