Creating LUNs without host entities

You can use SnapDrive for UNIX commands to provision storage by creating a LUN on the storage system.

Steps

1. At the command-line interface, enter the following command:

```
snapdrive storage create -lun long_lun_name -lunsize [lun_name ...] -lunsize size
[{-reserve | -noreserve}] -igroup ig_name [ig_name ...]ig_name [ig_name ...]
```

SnapDrive for UNIX creates the LUNs you specify.

Example: creating three 10 GB LUNs on a storage system

```
snapdrive storage create -lun acctfiler:/vol/vol1/lunA lunB lunC - lunsize 10g
```
