Verifying login information for Vserver 1

Verifying login information for Vserver

You can verify if the Vserver is configured in SnapDrive for UNIX using the `snapdrive config list` command.

Steps

1. Enter the following command: `snapdrive config list`

This command displays the user name or Vserver specified in SnapDrive for UNIX, and does not display the passwords for the Vserver.

The following example displays the `vsadmin` as a `StorageSystem`.

```
# snapdrive config list
username      appliance name  appliance type
-----
vsadmin       clstr-vs2      StorageSystem
```
