# Verifying login information for Virtual Storage Console

You can verify if the virtual interface is configured in SnapDrive for UNIX using the `snapdrive config list` command.

## Steps

1. Enter the following command: `snapdrive config list`

This command displays the user name or virtual interface specified in SnapDrive for UNIX. This does not display the passwords for the virtual interface system.

The following example displays the user that is corresponding with a virtual interface named as `ruffleskin`.

```
# snapdrive config list
user name      appliance name  appliance type
-----
root          rumplestiltskins  StorageSystem
sdadmin       ruffleskin       VirtualInterface
```
