The smo clone detach command

After splitting a cloned volume from its parent volume in Data ONTAP, you can run the clone detach command from SnapManager to let SnapManager know that the volume is no longer a clone.

Syntax

```
smo clone detach -profile profile_name -label clone_label
```

Parameters

- **-profile profile_name**
Specifies the profile name from which the clone is created.
- **-label clone_label**
Specifies the name generated by the clone operation.

Example

The following command detaches the clone:

```
smo clone detach -profile SALES1 -label sales1_clone
```
