The smo history list command

This command enables you to view a list of history details of the SnapManager operation.

Syntax

```
smo history list
-profile \{-name profile_name \[profile_name1, profile_name2\] \} -all
-repository
-login \{-password repo_password\}
-username repo_username
-host repo_host
-dbname repo_dbname
-port repo_port}
-operation \{-operations operation_name \[operation_name1,
operation_name2\] \} -all\}
\{-delimiter character\}
\{-quiet \} -verbose\}
```

Parameters

- **-profile profile**

Specifies the name of the profile. This name can be up to 30 characters long and must be unique within the host.

- **-repository**

The options that follow -repository specify the details of the database that stores the profile.

- **-dbname repo_dbname**

Specifies the name of the database that stores the profile. Use either the global name or the SID.

- **-host repo_host**

Specifies the name or IP address of the host computer the repository database runs on.

- **-login**

Starts the repository login details.

- **-username repo_username**

Specifies the user name needed to access the database that stores the repository.

- **-port repo_port**

Specifies the TCP port number used to access the database that stores the repository.

- **-operation {-operationsoperation_name [operation_name1, operation_name2] | -all**

Specifies the SnapManager operation for which you configure the history.

- **-quiet**

Displays only error messages on the console. The default is to display error and warning messages.

- **-verbose**

Displays error, warning, and informational messages on the console.

Example command

```
smo history list -profile -name PROFILE1 -operation -operations  
backup -verbose
```
