# The smo\_server status command

You can run the `smo_server status` command to view the status of the SnapManager host server.

## Syntax

```
smo_server status  
\[ -quiet \| -verbose \]
```

## Parameters

- **-quiet**

Specifies that only error messages are displayed in the console. The default is to display error and warning messages.

- **-verbose**

Specifies that error, warning, and informational messages are displayed in the console.

## Example

The following example displays the status of the host server:

```
smo_server status  
SMO-17104: SnapManager Server version 3.3.1 is running on secure port  
25204 with PID 11250  
and has 0 operations in progress.
```
