The smo clone list command

This command lists the clones of the database for a given profile.

Syntax

```
smo clone list
-profile profile_name
-delimiter character
\[-quiet \| -verbose\]
```

Parameters

- **-profile profile_name**

Specifies the list of clones associated with the profile. The profile contains the identifier of the database and other database information.

- **-delimiter character**

When this parameter is specified, the command lists the attributes in each row separated by the character specified.

- **-quiet**

Displays only error messages on the console. The default is to display error and warning messages.

- **-verbose**

Displays error, warning, and informational messages on the console.

Example command

The following example lists the database clones in the SALES1 profile.

```
smo clone list -profile SALES1 -verbose
```

```
ID Status SID Host Label Comment
-----
8ab...01 SUCCESS hsdhc server1 back1clone test comment
```
