Creating operation-level dump files

You can use the smo operation dump command with the name or ID of the failed operation to get log information about a particular operation. You can specify different log levels to gather information about a specific operation, profile, host, or environment.

1. Enter the following command: `smo operation dump -idguid`

The smo operation dump command provides a super set of the information provided by the smo profile dump command, which in turn provides a super set of the information provided by the smo system dump command.

Dump file location:

```
Path: /<user-home>  
/.netapp/smo/3.3.0/smo_dump_8abc01c814649ebd0114649ec69d0001.jar
```
