Destroying a profile 1

Destroying a profile

SnapManager enables you to destroy the profile associated with the split clone (database) along with the underlying storage. Before destroying the profile, ensure you remove the associated backups and clones.

1. To destroy a profile created using the split clone operation as well as the split clone database, enter the following command: `smo profile destroy -profileprofile [-hosthostname] [-quiet | -verbose]`

```
smo profile destroy -profile AUTO-REVEN
```
