Creating an Oracle user for the repository database instance

An Oracle user is required to log in to and access the repository database instance. You must create this user with *connect* and *resource* privileges.

1. Log in to SQL *Plus: `sqlplus '/ as sysdba'`
2. Create a new user and assign an administrator password to that user: `create user user_name identified by admin_password default tablespace tablespace_name quota unlimited on tablespace_name;`
 - `user_name` is the name of the user you are creating for the repository database.
 - `admin_password` is the password you want to assign to the user.
 - `tablespace_name` is the name of the tablespace created for the repository database.
3. Assign *connect* and *resource* privileges to the new Oracle user: `grant connect, resource to user_name;`
