Starting the SnapManager server 1

Starting the SnapManager server

You must start the SnapManager server from the target database host.

1. Log in to the target database host and start the SnapManager server: `smo_server start`

The following message is displayed: SnapManager Server started on secure port `port_number` with PID `PID_number`.

The default port is 27214.

You can verify that SnapManager is running correctly: `smo system verify`

The following message is displayed: Operation Id `operation_ID_number` succeeded.
