Accessing SnapManager 1

Accessing SnapManager

You can access SnapManager by using either the command-line interface (CLI) or graphical user interface (GUI).

You can perform different SnapManager operations in the following ways:

- By entering commands in the CLI on a host that is in the same network as the database host.

For a list of all the commands and an explanation of their options and arguments, see the Command Reference chapter.

To access the CLI, click **Start > All Programs > NetApp > SnapManager for Oracle > Start SMO command-line interface (CLI)**.

- By accessing the GUI on a host in the same network as the database host.

The GUI provides simple and easy-to-use wizards to help you perform different operations.
