The smo clone update command

This command updates information about the clone. You can update the comment.

Syntax

```
smo clone update
-profile profile_name
\[-label label \|-id id\]
-comment comment_text
\[-quiet \|-verbose\]
```

Parameters

- **-profile profile_name**

Specifies the name of the profile containing the clone you want to update. The profile contains the identifier of the database and other database information.

- **-id id**

Specifies the ID for the clone. The ID is generated by SnapManager when you create a clone. Use the smo clone list command to display the ID for each clone.

- **-label label**

Specifies the label for the clone.

- **-comment**

Shows the comment entered in the clone creation. This is an optional parameter.

- **-quiet**

Displays only error messages on the console. The default is to display error and warning messages.

- **-verbose**

Displays error, warning, and informational messages on the console.

Example command

The following example updates the clone comment.

```
smo clone update -profile anson.pcrac5
-label clone_pcrac51_20080820141624EDT -comment See updated clone
```
