The smo notification set command

You can use the notification set command to configure the mail server.

Syntax

```
smo notification set
-sender-email email_address
-mailhost mailhost
-mailport mailport
[-authentication
-username username
-password password]
-repository
-dbname repo_service_name
-port repo_port]
-host repo_host
-login -username repo_username
[-quiet | -verbose]
```

Parameters

- **-sender-email email_address**

Specifies the sender's email address from which the email alerts are sent. From SnapManager 3.2 for Oracle, you can include a hyphen (-) while specifying the domain name of the email address. For example, you can specify the sender email address as -sender-email071bfmdatacenter@continental-corporation.com.

- **-mailhost mailhost**

Specifies the name or IP address of the host server that handles email notifications.

- **-mailport mailport**

Specifies the mail server port number.

- **-authentication -username username -password password**

Specifies authentication details for the email address. You must specify the user name and password.

- **-repository**

Specifies the details of the repository database.

- **-port repo_port**

Specifies the Transmission Control Protocol (TCP) port number used to access the repository database.

- **-dbname repo_service_name**

Specifies the name of the repository database. You can use either the global name or the system identifier.

- **-host repo_host**

Specifies the name or IP address of the host where the repository database resides.

- **-login**

Specifies the repository login details. This is optional. If not specified, SnapManager defaults to OS Authentication Connection Mode.

- **-username repo_username**

Specifies the user name required to access the repository database.

- **-quiet**

Displays only error messages in the console. The default is to display error and warning messages.

- **-verbose**

Displays error, warning, and informational messages in the console.

Example

The following example configures the mail server:

```
smo notification set -sender-email admin@org.com -mailhost
hostname.org.com -mailport 25 authentication -username davis -password
davis -repository -port 1521 -dbname SMOREPO -host hotspur
-login -username grabal21 -verbose
```
