The smo version command

You can run the version command to determine which version of SnapManager you are running on your local host.

Syntax

```
smo version  
\[ -quiet \| -verbose \]
```

Parameters

- **-quiet**

Displays only error messages in the console. The default is to display error and warning messages.

- **-verbose**

Displays the build date and contents of each profile. Also displays error, warning, and informational messages in the console.

Example of the version command

The following example displays the version of the SnapManager:

```
smo version  
SnapManager for Oracle Version: 3.3.1
```
