Identifying an existing database to backup 1

Identifying an existing database to backup

You can identify the system identifier (SID) of the SnapManager database which is used in creating a profile.

The standard Oracle user ID for non-SAP systems is oracle.

1. Click **Start > Control Panel > Administrative Tools > Services**.
2. Verify the Oracle service, OracleServiceSID.

If the service is called OracleServiceFASDB, then the database SID is FASDB.
