Viewing detailed clone information

You can view detailed information about a specific clone by using the clone show command.

The clone show command displays the following information:

- Clone system identifier and clone ID
- Clone operation status
- Clone create start and end date or time
- Clone label
- Clone comment
- Backup label and ID
- Source database
- Backup start and end time
- Database name, tablespaces, and data files
- Host name and file systems containing data files
- Storage system volumes and Snapshot copies backing the clone

1. Enter the following command: `smo clone show -profile profile_name [-label label | -id guid]`
