Viewing operation details

You can view detailed information about a particular profile to verify the success or failure of an operation. It can also help you determine the storage resources in use for a particular operation.

You can view the following details about a particular operation:

- Operation ID
 - Type of operation
 - Whether the operation was forced
 - Runtime information, including status, start and end date of the operation
 - The host on which the operation ran, including the Process ID and SnapManager version
 - Repository information
 - Storage resources in use
1. To view the detailed information for a specific operation ID, enter the following command: `smo operation show -profile profile_name [-label label | -id id] [-quiet | -verbose]`
