Installing SnapManager for Oracle

You can download and install SnapManager for Oracle in your environment and perform operations such as database backup, restore, recovery, and cloning.

The SnapManager for Oracle installation package includes the host server software and the graphical user interface (GUI) client software.

Preparing to install SnapManager for Oracle

The environment in which you are installing SnapManager for Oracle must meet certain software, hardware, browser, database, and operating system requirements. For the latest information about the requirements, see the Interoperability Matrix.

Interoperability Matrix: support.netapp.com/NOW/products/interoperability

Preinstallation tasks

Before installing SnapManager for Oracle, you must perform some additional tasks to set up your environment. The tasks that you have to perform depend on the operating system, Oracle components, and the database version you want to use.

- Install licensed operating system with the appropriate patches.
- Set the operating system's and the Oracle database's languages to English.

For example, to set the language of the Oracle database to English assign `NLS_LANG = AMERICAN_AMERICA.WE8MSWIN1252`. For more information about how to set the language, see the *Troubleshooting SnapManager for Oracle* section.

- Install Oracle Recovery Manager (RMAN) if you want to use RMAN with SnapManager for Oracle.
- Install Data ONTAP with licenses enabled for SnapRestore and the supported protocols such as Fibre Channel (FC) and Internet Small Computer System Interface (iSCSI) on all the storage systems.
- Install the following Oracle patches, if you are using Oracle databases 11.2.0.2 and 11.2.0.3:
 - 13413167 for Windows 32-bit
 - 13555974 for Windows 64-bit

Downloading the SnapManager for Oracle installation package

You can download the SnapManager for Oracle installation package from the NetApp Support Site.

1. Log in to the NetApp Support Site.
2. On the the NetApp Support Site page, click **Downloads > Software**.
3. In the Software Download table, go to the SnapManager product row and select **Oracle (Windows)** from the Select Platform drop-down list.
4. Click **Go**.

The SnapManager releases are listed.

5. Click **View & Download** for the SnapManager release that you want to install.

The description page is displayed.

You should read the information available on this page.

6. At the bottom of this page, click **Continue**.

The license agreement page is displayed.

You should read the information available on this page.

7. Click **Accept**.

The download page is displayed.

8. Download the installation package for your host.

You can download the installation file to any location on the machine on which you want to install SnapManager for Oracle.

NetApp Support Site: mysupport.netapp.com

Installing SnapManager for Oracle

You can install SnapManager on the host that has one or more databases to be managed. You can install only one SnapManager instance per host.

- You must have completed the required preinstallation tasks.
- The latest SnapManager installation package must be downloaded.
- The appropriate version of SnapDrive for Windows must be installed and configured on all the target hosts.

For information about installing and configuring SnapDrive for Windows, see *SnapDrive for Windows Installation and Administration Guide*.

1. Double-click the SnapManager installation file:

If the operating system is...	Then use...
Windows x86	netapp.smo.windows-x86-version.exe

Windows x64	netapp.smo.windows-x64-version.exe
-------------	------------------------------------

The following message is displayed: The publisher could not be verified. Are you sure you want to run this software?

2. Click **OK**.
3. In the Introduction window, click **Next**.
4. In the Choose Install Folder window, either click **Next** to accept the default installation location or select a new location.

The default location is: C:\Program Files\NetApp\SnapManager for Oracle.

5. In the Menu Availability window, click **Next**.
6. In the Specify Service Properties window, enter the account and password information for Windows service.

The specified account must be a member of the following groups:

- The storage system's local administration group
 - The local administrator's group
 - The ORA_DBA group You can specify whether the service must start automatically after reboot or should be started manually.
7. In the Pre-Installation Summary window, click **Install**.
 8. In the Install Complete window, click **Next**.
 9. In the Important Information window, click **Done** to exit the installer.

After completing the installation, you can verify that the installation was successful:

1. Start the SnapManager server:
 - a. In the Windows Services window, select **NetApp SnapManager version for Oracle**.
 - b. In the left panel, click **Start**.
2. Verify that the SnapManager system is running correctly:
 - a. Click **Start > Programs > NetApp > SnapManager for Oracle > Start SMO Command Line Interface (CLI)**.
 - b. In the command-line interface (CLI), enter the following command: smo system verify The following message is displayed: Operation Id number succeeded.

number is the operation ID number.
